

# Shephards Lane area

Australian Government

NSW  
GOVERNMENT

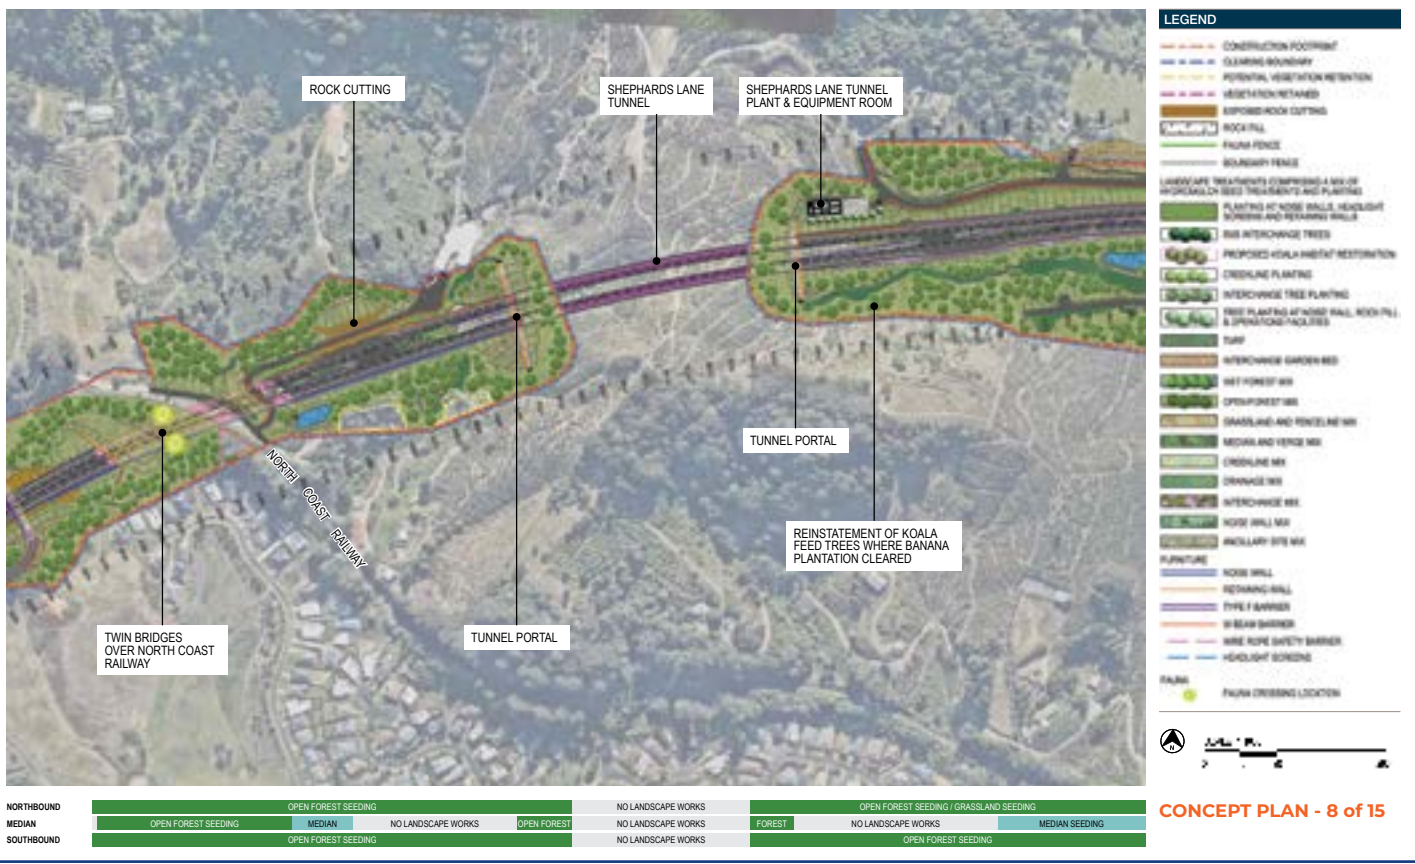

Bridge over highway on Shephards Lane from the northbound lanes

## Key features:

- The Shephards Lane Tunnel is about 320 metres long
- The tunnel portals have been designed to fit in with the natural environment by minimising cut heights, using an exposed architectural rock treatment finish and landscaping the side slopes for framing and to connect into adjoining vegetation
- There will be a tunnel equipment facility near the northern portal on the western side of the highway
- Aboriginal artwork features on the noise wall connecting to the southern portal
- Open forest Koala plantation is prioritised directly to the north and south of the portals, with fauna connectivity maintained over the top of the tunnel
- An overpass bridge facilitates local access across the highway for Shephards Lane
- The bridge over the North Coast Railway is the longest bridge on the bypass
- The bridge will feature a transparent noise wall to facilitate open view of the valley.
