Dear Hari

Coffs Harbour Bypass – Air Quality Monitoring Program: ER Approval of Minor Update

In my capacity as Environmental Representative, I have reviewed the following document:

- Air Quality Monitoring Program (Revision G, 02/01/2024, prepared by Ferrovia Gamuda Joint Venture)

The Air Quality Monitoring Program is Appendix A of the Construction Air Quality Management Plan. The above version of the monitoring program is an update to the previously approved version, which is Revision E dated 19/09/2023. The updates to the document include:

- Inclusion of two additional dust monitoring gauges (DDG10.5 and DDG11.5) in the vicinity of West Korora Road.
- Minor relocation of dust monitoring gauge DDG14 to a location that is outside of the construction footprint.

In accordance with MCoA A25(i), I confirm that the updates are considered to be minor amendments and, therefore, I approve the updated document.

Yours sincerely
